

Oleh Levchenko

SENIOR BACKEND DEVELOPER (NODE.JS / NESTJS / TYPESCRIPT / AWS)

United Kingdom | leva13007@gmail.com | 07552827084 | linkedin.com/in/oleh-lev | github.com/leva13007

SUMMARY

Senior Backend Developer with 9+ years of experience building scalable Node.js and TypeScript services, APIs and cloud-based systems. Experienced with NestJS, GraphQL, AWS, microservices, automated testing and CI/CD. Strong in system design, technical decision-making, code review and mentoring developers (10+ mentored to date). Also explores AI-driven engineering, and hosts IT Friday, a weekly developer community.

CORE SKILLS

- **Backend:** Node.js, NestJS, TypeScript, GraphQL (Apollo), REST API design, microservices, SQL
- **Cloud & DevOps:** AWS (Lambda, ECS, S3, CloudFormation/SAM, Step Functions, SQS/SNS, DynamoDB, IAM, Cognito), CI/CD (CodeBuild/CodePipeline, GitHub Actions), Docker
- **Testing:** Jest, Vitest, integration & unit testing, Cypress, Playwright
- **Architecture:** Microservices/service-boundary design, API design, system design, code review practices
- **AI-assisted development:** Claude Code (CLI), OpenAI Codex — agentic coding workflows, automation
- **Also:** React, TypeScript, JavaScript (frontend, where end-to-end delivery is needed)

EXPERIENCE

Full Stack Developer (backend-focused) — The AA (UK)

Aug 2022 – Present

Sales and support platform for AA Driving School, serving over 30k users; team of 3-6 full-stack developers.

- Design and build backend services in Node.js/TypeScript — GraphQL (Apollo) APIs, database layers, and integrations — across a microservices architecture behind an API Gateway (NestJS) that owns auth/permissions/login, with dedicated Core (domain logic) and Address services
- Deploy on AWS serverless infrastructure (Lambda, ECS, S3, Step Functions, SQS/SNS, DynamoDB), with infrastructure as code via SAM/CloudFormation. Contributed to CI/CD pipeline design (CodeBuild/CodePipeline) and led migration of parts of the test pipeline to GitHub Actions; leading research into migrating private npm packages to AWS CodeArtifact
- Integrated third-party services: AWS Cognito, payments/refunds provider, analytics platforms, and [Monday.com](https://www.monday.com)
- Developed batch-processing services integrating with financial systems, handling high-volume data (database in the millions of records, with full versioning)
- Introduced unit and integration testing (Jest, Vitest) and are completing a migration to Vitest across the codebase, increasing deployment confidence
- Led code review and drove cross-cutting architecture decisions, catching design and scalability issues

JavaScript Developer — DataArt

Jan 2021 – Aug 2022

- Built and maintained REST and GraphQL APIs — backend services and data-processing logic — across enterprise client projects
- Worked on a large-scale enterprise Gatsby platform serving global markets, including localisation across dozens of countries (including RTL languages such as Arabic)
- Built frontend applications in React and TypeScript, consuming the GraphQL APIs above
- Worked on systems handling large datasets, with a focus on performance and reliability
- Collaborated in an Agile team, contributing to CI/CD workflows and release processes

Full Stack Developer → Web Team Lead — TopDevs

Jan 2019 – Jan 2021

- Built and maintained CRUD APIs and backend services using Node.js/Express, alongside earlier Laravel/PHP backend work
- Advocated for and drove Docker adoption across the team, containerising services to standardise local development and deployment
- Progressed to Web Team Lead — handling technical planning, estimation, and risk assessment for the department's projects
- Led the frontend stack transition from Laravel/Blade to Vue.js, and later introduced React and React Native as project needs evolved

PHP Developer — S-PRO

Apr 2017 – Dec 2018

- Developed and maintained web applications and REST APIs using Laravel and WordPress
- Integrated third-party services and improved legacy systems architecture, introducing modular design practices
- Delivered multiple production systems, reducing manual processes for clients
