

Oleh Levchenko

SENIOR FRONTEND DEVELOPER (REACT / TYPESCRIPT / GRAPHQL)

United Kingdom | leva13007@gmail.com | 07552827084 | linkedin.com/in/oleh-lev | github.com/leva13007

SUMMARY

Senior Frontend Developer with 9+ years of experience building scalable React and TypeScript applications, from complex UI systems to full end-to-end features. Experienced with React, TypeScript, Redux, GraphQL, Gatsby, Storybook, accessibility and performance optimisation, automated testing and CI/CD. Strong in system design, technical decision-making, code review and mentoring developers (10+ mentored to date). Also explores AI-driven engineering, and hosts IT Friday, a weekly developer community.

CORE SKILLS

- **Frontend:** React, TypeScript, JavaScript, Redux/RTK, Gatsby, Storybook, Accessibility (a11y), SSR/CSR/SSG
- **Backend (supporting):** Node.js, NestJS, REST/GraphQL API design, SQL
- **Cloud & DevOps:** AWS (Lambda, ECS, S3, CloudFormation/SAM, Step Functions, SQS/SNS, DynamoDB, IAM, Cognito), CI/CD (CodeBuild/CodePipeline, GitHub Actions), Docker
- **Tooling:** Vite, pnpm, ESLint, Prettier, Husky, Commitlint
- **Testing:** Jest, Vitest, React Testing Library, Cypress, Playwright, Storybook-driven component testing
- **Architecture:** Modular/component design, API design, system design, code review practices
- **AI-assisted development:** Claude Code (CLI), OpenAI Codex — agentic coding workflows, automation

EXPERIENCE

Full Stack Developer (frontend-focused) — The AA (UK)

Aug 2022 – Present

Sales and support platform for AA Driving School, serving over 30k users; team of 3-6 full-stack developers.

- Designed and implemented end-to-end features across database, GraphQL (Apollo) API, and React frontend
- Introduced Storybook across all frontend applications, cutting reported bugs by roughly half and eliminating so-called “silent” UI bugs entirely
- Led the migration of frontend tooling to modern equivalents (Node.js 24, Vite in place of Webpack, pnpm in place of npm, Vitest in place of default React test tooling), reducing application startup/build time
- Acted as a technical gatekeeper for frontend-related decisions in a backend-heavy team, improving consistency and long-term maintainability
- Led code review and drove cross-cutting architecture decisions, catching design and scalability issues

JavaScript Developer — DataArt

Jan 2021 – Aug 2022

- Built complex frontend applications using Gatsby, React, TypeScript, and GraphQL in an enterprise environment
- Developed data-heavy dashboards with dynamic visualisations and reporting tools
- Worked on a large-scale enterprise platform serving global markets, including localisation across dozens of countries (including RTL languages such as Arabic)
- Placed strong emphasis on performance and accessibility (a11y), reflecting the client’s international, high-visibility user base
- Collaborated in an Agile team, contributing to CI/CD workflows and release processes

Full Stack Developer → Web Team Lead — TopDevs

Jan 2019 – Jan 2021

- Delivered full-stack features using React, Vue.js, Node.js, and Docker in client-facing projects
- Grew from Laravel developer into a full-stack generalist (Laravel → Vue.js → React), then into team lead for the web development team
- Led the frontend stack transition from Laravel/Blade to Vue.js, and later introduced React and React Native as project needs evolved
- Improved application performance by reducing page load time by ~30% through optimisation of React rendering and API requests
- Progressed to Web Team Lead — handling technical planning, estimation, and risk assessment for the department’s projects

PHP Developer — S-PRO

Apr 2017 – Dec 2018

- Developed and maintained web applications using Laravel and WordPress
- Built REST APIs and integrated third-party services
- Improved legacy systems architecture, introducing modular design practices
